Atlanta Grand Opening

The December grand opening for a warehouse near Atlanta gave Maxzone a chance to showcase its new facility and show customers its appreciation for their business by awarding thousands of dollars in cash and prizes. The event began with a lunch and raffle, and culminated in a daylong city tour that took

attendees to Stone Mountain Park, the World of Coke museum and various points in and around Atlanta, including dinner at the Sundial Restaurant. Along with DVD players, golf clubs, two plasma screen TVs, a trip to Taiwan and more, the raffle featured a super grand prize of \$20,000, which was won by Tom Knoedl, right, president

of Midstate Aftermarket Body Parts, and his wife, Brenda. The award was presented by Polo Hsu, president of Maxzone and DEPO Hsu, chairman of DEPO along with Nationals Sales David Sanchez.

DEPO obtains QS/TS16949

After obtaining QS9000, in August of 1997, the next progression for DEPO was obtaining TS16949 which they successfully accomplished in September of 2004. With the new documentation, DEPO can better understand how their enterprise can interrelate and enable higher efficiency and effectiveness. At the same time, because the system is much more Management driven, administering groups are expected to deliberate their actions based on customer needs, thus

achieving better customer satisfaction. Jack Chia, Quality Control Manager of DEPO, who led the project comments, "I applaud our team for putting all their efforts in obtaining this important certification. It continues to show DEPO's long term commitment in improving its quality control and production process. This is a major milestone for DEPO because TS-16949 is an OEM standard and it propels DEPO to the level of world class Tier One OEM suppliers."

DEPO believes that this

globally recognized certification will help provide additional confidence in global sourcing, which in the long run, will enable greater business opportunities for both themselves and their customers.
